

ATTENTION

CE Compliance is provided only when the mating connector on the card file backpanel is a filtered connector with a metal case and the mating connector on the FTA is a connector with a metal case. The metal connector case grounds the cable shield at both ends of the cable.

FTA models

The following table lists the available FTAs by type, model, and component part number. It also lists terminal type, number of channels, and mounting size for reference. The codes used for terminal type are as follows.

- C = Compression-Type Terminal Connector
- CP = Crimp-Pin Terminal Connector
- RS = Removable-Screw Type Terminal Connector
- S = Fixed-Screw Type Terminal Connector

ATTENTION

If you order a FTA by model number only, the CE-Compliant version will be supplied by default.
